26 YEARS MARINEPOOL

Adrenaline, innovation and continuously pushing the limits along with the natural elements are as much part of sailing as tradition, aesthetics and pure excitement. Extremes attract – sailing and maritime clothing attract.

About the joy of sailing – or how to turn your hobby into your job which doesn't leave much time for sailing any longer. The brand was created by German sailors Gerhard & Stefan Eberle and Robert Stark in 1991, true to their credo made by "sailors for sailors". Ambitiously, the friends chose the globe for their logo, clearly indicating their goal of building an international brand. The three guys from Munich took up the challenge and what seemed tilting at windmills in early days turned into a success story. The company and the Marinepool brand grew and went international.

The global success of Marinepool can be attributed to several factors. One element are the three founders, who are totally different characters and complementing each other at the same time. Different points of view and approaches focused on a common goal are key to success. The support of countless friends, yacht clubs, sailing federations and world class athletes from all over the world is another vital part. Last but not least, the most important success factor is the Marinepool team. Our staff that lives our spirit and who are the soul of Marinepool. Without their commitment, loyalty and their drive Marinepool would not be where we are today.

However, the increasing demand for "après-sailing clothing" as well as team and corporate wear soon led to a full product range including technical fashion and lifestyle wear. Today, the extensive product portfolio represents the founder's original purpose.

The brand is ranging from a new innovative dinghy collection to foul weather gear offshore sailing clothing as well as to an impressive crew wear for grand prix racing and superyachts. Marinepool offers the perfect sailing gear for any sailing activity – meeting the various demands. Additionally, Marinepool proposes outdoor products, technical fashionable clothing for sailing and other water sport activities, as well as fashion collection for women, men and children with a unique maritime style showing the typical Marinepool handwriting.

MARINEPOOL | DESIGN. TECHNOLOGY. PASSION.

Marinepool actively supports many high profile projects and campaigns and is the official clothing supplier to world-class teams, events and event series in sailing and power boating such as GC 32 Racing Tour, Alinghi, Bronenosec Racing Team, Oman Sail, Spindrift racing, SFS Team as well as the national French Sailing Team (FFVoile) and Austria (ÖSV) and last but not least, the world's fastest racing yacht, the Maxi Trimaran, Spindrift 2.

Stefan Eberle, CEO

Robert Stark, CEO

SPINDRIFT RACING

Based in the south of Brittany, the racing stable Spindrift racing was founded by Dona Bertarelli and Yann Guichard in 2011. Over the first five years Spindrift racing has grown and flourished, becoming a benchmark in international sailing. The team, who celebrated their fifth anniversary last year, has already proven highly successful in all types of regattas and oceanic record challenges. A number of these high level challenges have been met, a solid, talented technical and communication team is well established, working equally well on land and sea.

At the beginning there were just two boats: the D35 catamaran Ladycat, skippered by Dona Bertarelli and today the three-time winner of the Bol d'Or Mirabaud, and a 70-foot (21 metre) oceanic trimaran that won races across the Atlantic and in and around Europe.

Then, in 2013 Spindrift 2, the world's largest oceanic trimaran and an already legendary craft built to set crewed records, joined the fleet. Within a few months the Spindrift crew won the prestigious Rolex Fastnet Race onboard this giant of the ocean, and set their first oceanic record on the Route of Discovery.

Spindrift 2 was taken into the yard for Yann Guichard and the team to modify the 40-metre multihull to be suitable for solo racing in the 2014 Route du Rhum. The physical test for Guichard was colossal but he finished the race in second place, racing solo from Saint-Malo to Guadeloupe in only eight days.

The ensuing seasons are marked by participation in new and different circuits - but all in multihulls. Sailboat racing is beginning to change and boats are literally, starting to fly and Spindrift is involved in these innovative circuits from the outset, including the GC32 foiling catamaran in 2015. In that same year Spindrift won the Tour de France when it was raced in multihulls for the first time.

In 2016 Yann Guichard was the only French skipper to compete on the World Match Racing tour, but before this circuit starts, the team take on the biggest offshore challenge there is – round the world non-stop via the three great Capes – the ultimate record attempt for the Jules Verne Trophy. During the winter of 2015-16 Dona Bertarelli, Yann Guichard and their crew of 12 completed a remarkable, 40,000km round-the-world epic, from Ushant to Ushant on the tip of Brittany. It was to prove an incredible journey and an exceptional human adventure. They set the second fastest time for sailing around the world, and Dona Bertarelli became the fastest female sailor around the world.

The Jules Verne Trophy remains an abiding and engaging target, one that the team will once more challenge in the winter of 2017. www.spindrift-racing.com

INCREASED VISIBILITY - MARINEPOOL PREMIUM RANGE OF LIFEJACKETS

**BE SEEN,
BE FOUND.**

LUME-ON™

The groundbreaking Lume-On™ technology is illuminating the inflated air chamber in order to increase the visibility of the user.

The effect of the LED lights is increased through the neon-colored buoyancy chambers that catch the attention of potential rescue people. Lume-On™ is located on the bottom of the chamber and is activated as soon as there is water contact. Once activated, the lights will be blinking intensively up to eight hours.

This new developed lifejacket sets new milestones in terms of safety.

Possible rescue vests with Lume-On™: Aero Plus, Premium 180 and 300N and ISO Pro 180N and 300N.

NORD STREAM RACE

750 nautical miles

70 sailors

5 participating nations

The Saint Petersburg Yacht Club, assisted by the Norddeutscher Regatta Verein and other top sailing clubs in the Baltic Sea is organising the Nord Stream Race.

The route 2017 of this challenging offshore regatta will follow the Nord Stream pipeline,

leading the participants from Germany via Denmark, Sweden, Finnland to the final in Saint Petersburg.

Taking on the challenge to sail the approximately 750 nautical miles across the whole of the Baltic Sea with all its demanding weather conditions are five brave teams on board of elegant and fast Swan yachts. They have been invited by Saint Petersburg Yacht Club, owner

of the Swan fleet, to increase friendship between nations. The teams consist of a mixture of young talented sailors and experienced offshore professionals, representing some outstanding sailing clubs from different nations. In order to encourage young talents.

The Baltic is renowned for its unpredictable and sometimes harsh conditions at this time of the year.

Marinepool is the official clothing partner of the event and Marinepool performance ocean sailing clothing will keep the crews on the fleet of Swan60s dry, warm and comfortable, enabling them to focus on their competition and the fight with the elements even when the going gets tough.

FABRICE AMÉDÉO - IMOCA NEWREST/MATMUT

Fabrice Amédéo, both journalist and passionate sailor, has chosen to give up his office job to live his dream: to sail the great ocean races and to sail solo and non-stop around the world.

With his skills and experience in offshore racing, he is an allrounder, equally at ease among crews or sailing single handed. He has 7 trans-Atlantic races under his belt and was competing in the double handed Transat Jacques Vabre

with Eric Peron, when this catalogue went into print.

In 2016 Fabrice will take on his greatest challenge so far, The Vendée Globe, sailing's Everest. The Vendée is arguably the toughest sailing race in the world and in theory an utterly simple affair. A regatta around the world, for singlehanded sailors, without any stopover. France to France, leave Antarctica to Starboard. That's it. In theory at least, because

beyond this, the Vendée Globe is the stuff of legends.

Marinepool is proud to partner up with Fabrice Amédéo in this great human and sporting adventure and provide him with the latest generation of ocean racing clothing made for the most extreme conditions, keeping the sailor warm and dry for a balanced body climate so all his focus can be directed on performance.

| FABRIC | 100% polyamide, MPU membrane | |
| FEATURES | Auckland jacket offers full weather protection and ticks all the boxes for a coastal jacket in an optimized fit. The jacket is made from durable, but soft 2-layer fabric which is super comfortable to wear. The MPU membrane and DWR finish keep reliably dry and allow to permeate quickly. Fully waterproof taped seams. Construction details: Large Cordura® reinforcement at bottom. Extra high fleece lined collar for wind and spray protection. Fully adaptable highly visible hood tucked away inside collar. Tough 2-way zip at front, covered by double placket. Adjustable double cuffs with soft PU seals inside. Flat pockets at chest. Spacious lower pockets with top and side entry; side entry with fleece lining to keep hands warm. Lining with inner pocket and big mesh area for extra venting. | |
| SAFETY | 3M microprismatic reflectors at hood, shoulders and placket. | |
| EXTRAS | Zip-in system allows to attach optional midlayer insulation jacket "Luca". | |
| SPECIALS | WP 20.000mm / MVP 15.000/sqm/24h | |
| COLOUR | yellow/navy red/dark grey | |

HOBART III Jacket

Art.-No. 1003050 XS - XXXL

FABRIC Outshell/Coating:100% polyamid/100% polyurethane Lining:100% polyamid

FEATURES Much more than a facelift! Hobart 3 jacket is the successful evolution of the classic Hobart jacket. Next to the material and colour mix, there is a new offshore collar, the brandnew wp pocket system and the 2in1 inzip option, which advance the Hobart 3 jacket to the next level. The wp pocket system allows to mount a separate waterproof pocket into the jackets right outer pocket. Proven 2-layer Nylon fabrics with MPU coating provides high durability, waterproofness and breathability. Fully taped seams and waterproof. Other features: Double cuffs, double placket. High fleece lined collar with spray protector and signal hood stored inside. Chest pocket, outer pockets with top and side entry and fleece lining. Mesh/taffeta lining with a inner pocket. 3M® reflective at shoulder and hood plus other reflective details. A new standard and great value!

Supplier of

DLRG

COMPETENCE IN SAFETY

Marinepool – Europe's leading manufacturer of life jackets in the sports and leisure industry – has dozens of cooperations with rescue organizations and special forces trained in search and rescue operations around the globe. People who risk their own life in order to save other's life trust in Marinepool life jackets.

Life belts and accessories when their safety is at stake wear high tech protective clothing by Marinepool equipped with additional safety features like highly visible reflective bands by 3M™ and various pockets for VHF and other electronic devices.

MARINEPOOL FOUNDATION

The Marinepool Foundation was established in 2013 based on its partnership with the "DLRG – Foundation for water safety".

Its goal is to finance costs for fighting death by drowning and in order to do so it cooperates with the DLRG e.V.

The foundation pursues only and exclusively charitable aims and one major goal is the prevention of drowning by education, information and clarification. Furthermore it supports structures of civil engagement for the purpose and the qualification of emergency units as their professional equipment. Other responsibilities are the organization and provision of water emergency services, the participation of emergency response and disaster protection.

If you want to support the Marinepool Foundation please contact us:

OMAN SAIL

Oman Sail is a national initiative established in 2008 that uses the power of sport to contribute to the development of the Omani people. Oman Sail is one of the strongest growing brands in the sailing world. The initiative aims for promoting Oman as a luxury travel and investment destination but also for enhancing the development of the professional sailing sport in the Oman.

It encompasses a national sailing squad and high achieving inshore and offshore racing teams, all of which benefit from world-class coaching and whose ultimate objective is to win an Olympic medal for Oman. The programme has pledged to teach 70,000 Omani children to sail by 2020 at eight sailing schools, four of which are already operational. The goal is to rekindle Oman's maritime heritage while raising the country's regional and international

profile as a high-end tourist and foreign investment destination, through competitive sailing at home and abroad. Oman Sail seeks to instil confidence and to teach valuable, transferable life skills to a generation of Omanis.

The Omani sailing programme is highly successful, Omani teams have won the the Extreme Sailing Series™ three times with a fourth time likely in 2015. They are at the forefront of foiling and won the Bullitt GC32 Racing Tour in spectacular fashion ahead of rivals Alinghi and Spindrift racing. The initiative "Oman Sail" organizes the only offshore sailing event in Arabic waters "EFG Sailing Arabia - The Tour" and one of the largest regattas for Olympic and international dinghy classes with "Mussanah-Race Week", a high-class training camp and competition for ambitious young

talents that brings together the next generation with high-class sailors and professionals from all over the world.

Oman Sail's flagship, the MOD70 trimaran Musandam, sailed to a World Record around Britain and Ireland in 2014 and Round Ireland in 2015 with skipper Sidney Gavignet.

The partnership with Oman Sail goes back to 2011. Marinepool is the official clothing supplier to the Oman Sail organization and thus of the mentioned Oman Sail events and all Oman Sail racing teams, from olympic and dinghy classes to the leading Extreme Sailing Series™ catamaran "The Wave, Muscat", EFG Sailing Arabia - The Tour, Oman Sail M34 and last but not least the impressive MOD70 Oman Air - Musandam.

DAMIEN SEGUIN (FR)

Damien Seguin is now an Olympic legend. The French skipper has won the Gold in the Rio 2016 Paralympic Games and he had already done so in 2004 in Athens and won silver in Pekin in 2008.

Always up for new challenges, he is now aiming at the solo round the world race Vendée Globe 2020.

He is determined to show everyone that a small "difference" is not an obstacle to great performances.

The sailor is enthusiastic about all projects as soon as they are related to sailing and high level competition with valid and/ or handicapped athletes.

For this reason, he will participate in 2017 to the Tour de France à la Voile that gathers the best sailors in France with only one objective: the victory!

damienseguin.com

TECHINFO TEMPERATURE CONTROL SYSTEM (TCS):

basic layer: the basic layer (e.g. efficiency underwear) is worn directly on the skin and is most often made from non-absorbing synthetic fibre to insulate and transport the vapour away from the skin. never use cotton underwear as it will absorb the sweat causing a chilly and damp feeling.

insulating layer: the insulating layer is the middle or 2nd layer, you can choose from a wide range of garments or fibres. nowadays mostly synthetic fibres like polyester or natural fibres like Merino wool are being used as they insulate even when wet.

outer layer: this layer has three main tasks: 1. protect the middle layer from humidity (waterproof), 2. transport the humidity away from the mid layer (breathable), 3. stop the wind to prevent temperature loss (windbreaker)

LifeShirt®

By MARINEPOOL

Lifeshirt® is an auto-inflating personal flotation device that uses today's most advanced marine grade materials and technologies, applied to a full range of sports apparel for in and around the water.

The Lifeshirt product line offers a worry-free safety solution for all water enthusiasts - from children, to teens, to pros who make a living around marine environments.

Lifeshirt is built for adventure and is certified for both children and adults as an ISO 12402-5 Level 50 buoyancy aid.

be safe.®

FEATURES ON ALL MODELS:

- Moisture-wicking internal liner with antibacterial and Channel Flow® cooling technologies
- Machine washable on gentle cycle, hang to dry
- Includes two inflation cylinders and travel case
- Can be orally inflated without using a cylinder
- UPF 50+ sun protection

STRONGHOLD®

Art.-No. LS 5003304 / SS 5003305 **S - XXL**

| | |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FEATURES | Stronghold® is a Level 50 compression-fit buoyancy aid that provides instant flotation with the pull of a handle. The form fit design enhances athletic performance while providing added safety in and around the water. Provides 50N+ of buoyancy when inflated, offered in both automatic models and manual-only models. Short sleeve and long sleeve models available, breathable side mesh panels vent body heat. |
| SPECIALS COLOUR | CE ISO 12402-5 50N / UPF 50+ sun protection black |

WATCHDOG®

Art.-No. 5003306 **SM - LG**

| | |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FEATURES | Watchdog® is a Level 50 lightweight inflatable buoyancy aid specifically designed for children. The device provides instant flotation when a child's shoulders submerge below the water. Intended for children ages 5 to 12 (25kg and up) easy on and off with full front zipper, adjustable waistband secures device to the child's body. Crotch strap standard on size SM, manual-only inflation model available for size M and LG, removable long sleeves |
| SPECIALS COLOUR | CE ISO 12402-5 50N blue/green |

SAFEGUARD®

Art.-No. 5003307 **S - XXL**

| | |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FEATURES | Safeguard® is a Level 50 loose-fitting inflatable buoyancy aid providing over 70N of buoyant force. The comfortable and relaxed fit is perfect for recreational boating, fishing, paddlesports or just a day at the beach. Rated for whitewater, provides 70N+ of buoyancy when inflated, offered in both automatic models and manual-only models. Removable long sleeves, mesh side pockets, hidden internal waist band, utility loop |
| SPECIALS COLOUR | CE ISO 12402-5 50N UPF 50+ sun protection white (w/o picture) |

SUP DRYSUITS

Art.-No. 5002934

XXS - XXL

FABRIC Outshell/membrane/backing:100%polyamid/ 100% polyurethane/100% polyamid

FEATURES Stand-Up-Paddling, Dinghy, Kite, Surf – with the new SUP Drysuit the season never ends! Lighter and softer than classic drysuits, but still tough! Totally waterproof with a waterproof T-zip to enter, fully taped seams, latex seals at sleeve/leg and a soft neoprene seal at neck. The 3+1 layer Nylon fabric with microporous XPU membrane and additional coating is totally waterproof but still breathable. The knee and seat come with a flexible reinforcement. Fit is wide enough to allow freedom of movement and wearing insulation underwear. There are width adjuster at sleeves, legs and waist. Keypocket inside. This suit will not only catch eye but change your view on watersport season!

SPECIALS WP 20.000mm, MVP 10.000gr/sqm/24h

COLOUR red/grey/blue | red/grey/frog green

Weight 2.00kg

SUP LIGHT DRYSUITS

Art.-No. 5003218

XS - XXL

FABRIC Outshell: 94% polyamide/6% elastane membrane: 100% polyurethane

FEATURES Very light (1kg!), very breathable semi-drysuit, designed especially for SUP. Protects against spray and wind chill, allows any action. The hightech 3L fabric with HPU membrane is perfect for active use: light, stretchy, waterproof, very breathable (RET12) and yet durable. The drysuit features a soft neoprene collar, soft neoprene cuffs and latex seals at legs, waterproof of front zip, width adjuster for leg, sleeves and waist, soft reinforcement at knees, keypocket inside. The drysuit is fully taped and waterproof – only the neoprene collar construction is not 100% watertight for the benefit of comfort. So we call it semi-drysuit. Ergonomic unisex fit with raglan sleeves. Combine best with 1000095 Efficiency Underwear or 1003221 Action PP Longsleeve.

SPECIALS WP 20.000mm, MVP 20.000gr/sqm/24h (RET12)

COLOUR blue/red

ACTION Spray Top

Art.-No. 1003220 XS-XXL

FABRIC Outshell: 94% polyamide/6% elastane
membrane: 100% polyurethane

FEATURES Very light, very breathable spraytop. Protects perfectly against spray and wind chill. The hightech 3L fabric with HPU Membrane is perfect for active use: light, stretchy, waterproof, very breathable (RET12) and yet durable. The top features latex seal at wrists, soft and adjustable neoprene waistband, soft neoprene collar and keypocket inside. The top is fully taped and waterproof - only the neoprene collar construction is not 100% watertight for the benefit of comfort. Ergonomic unisex fit with raglan sleeves. Combine best with 1003219 Action Spray Trousers, 1000095 Efficiency underwear or 1003221 Action PP Longsleeve.

SPECIALS WP 20.000mm, MVP 20.000gr/sqm/24h (RET12)

DEUTSCHE SEGEL-BUNDESLIGA – THE GERMAN NATIONAL SAILING LEAGUE

In 2013 Marinepool partner Konzeptwerft introduced a new innovative concept to sailing in Germany: Deutsche Segel-Bundesliga – a national sailing league for yacht clubs. An idea so simple and brilliant that in hindsight it is hard to imagine it has not already been there. And an idea so successful that it has since been adopted by other nations, resulting in 14 national leagues in Europe and the USA with a SAILING Champions League event crowning the international top club.

Deutsche Segel-Bundesliga is the official German yacht club championship, sanctioned by the German Sailing Federation for the national title. The format resembles other sports championships. The best 36 yacht clubs of the country (selected through qualifiers and the previous season's results) sail against each other in several events around the country and in two separate leagues of 18 clubs. Races

are sailed in groups of 6 on one design yachts provided by the league in up to 45 races per weekend. The top clubs of the second league qualify for the 1st league the following year, new entries into the second league are determined in a qualifying regatta open to all clubs of the country.

A consistent performance all over the season is the secret to success in order to top the scores at the end of the season as no discard is allowed. The first two seasons of 2013 and 2014 were dominated by Norddeutscher Regatta Verein (NRV) but in 2015 and 2016 the young Marinepool sponsored crew of Deutscher Touring Yacht-Club, runner up in 2014, won the Championship in style.

Marinepool is on board of Segel-Bundesliga as the „Official Clothing Supplier“ of the championships and with team kit for the organisers and on the majority of the competing yacht club teams.

All races of Deutsche Segel-Bundesliga are streamed live over the event website. Expert commentators give inside information, in addition to the live stream spectators and viewers at home are offered GPS tracking and can analyse the races after the race day. Selected events will have the full SAP Sail Cube experience with public viewing, TV studio and on site broadcast.

Marinepool is very proud of all the teams in the German “Bundesliga” with excellent results in 2016. The DTYC (Deutscher Touring Yacht-Club) is double crowned champion by winning the “Bundesliga” in Hamburg as well as the Champions League.

As a cooperation partner, we are looking forward to season 2017 with the German National Sailing League!

NX INNOVATION Jacket

| | | |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|

COTTON

drirelease cotton offers a patented blend of 85% polyester hydrophobic (water repelling) fibers and 15% natural cotton hydrophilic (water absorbing) fibers.

The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the fabric where it can evaporate quickly. That's why clothing always feels soft and stays dry.

drirelease cotton fabric dries 4x faster than normal cotton.

BRONENOSEC RACING TEAM (TP52)

RC44 World Champion 2014

Russia has a long history as a successful nation in yacht racing and Bronenosec Racing Team has rightfully earned its name in the history books. The distinctively bright blue yachts campaigned by the St. Petersburg Yacht Club and Commodore Vladimir Liubomirov have been a force to be reckoned with on the grand prix circuits. Bronenosec yachts have won several World Championships in the Gazprom Swan60 Class to which the Club is a huge contributor, won the much coveted RC44 World Championship in 2014 and proved to be one of the top teams in the TP52 Super Series with a new launch in 2015. When this catalogue went into print Bronenosec was leading the 2015 RC44 match racing rankings and was 2nd in the fleet racing scores.

But the club is equally known for its support of youth sailing in Russia with an Academy for youngsters, the Gazprom Youth Sailing Challenge racing in Swan60 and RC44 and not least for a team of young guns in the Extreme Sailing Series skippered by Igor Lisovenko, which showed great sailing in the 2015 season.

Marinepool is proud partner and 'Official Clothing Supplier' of the St. Petersburg Yacht Club and the Bronenosec Racing Teams respectively.

DONA BERTARELLI

2016 was another successful year for our partner Spindrift racing.

They won the Quebec-St. Malo Transat in 6 days, 1 hour and 17 minutes and set a new course record, the team also won the Bol d'Or Mirabaud and the D35 Trophy championship with LadyCat, powered by Spindrift racing, and the team's founder Dona Bertarelli was awarded SUI 'Female of the Year' for a second time.

Hybrid TEC

Hybrid TEC jackets are a new generation of garments which bring together the advantages of softshell jackets with the positive qualities of conventional waterproof jackets.

The fabrics used in Hybrid TEC jackets have the same typical soft feel of softshells, are flexible like them and offer their excellent thermal insulation. They are mechanically robust, while at the same time they protect reliably from weather influences with a high performance membrane that makes garments using Hybrid TEC fabrics highly breathable and totally waterproof. Contrary to softshell jackets these new jackets have fully taped or welded seams, thus providing waterproofness all around.

The result are all-purpose jackets for outdoors and sport which are super comfortable and light weight like a soft-shell but with the highest possible protection from the elements

The Best of Two Worlds.

GC32 RACING TOUR

**OFFICIAL CLOTHING
SUPPLIER**

GC 32 RACING TOUR

The GC32 International Class Association was founded by Laurent Lenne, Flavio Mazzari, Andrew MacPherson and Christian Peer on 14 September 2014 in Marseille.

The idea of the GC32 International Class Association is to administer and promote regattas and other sailing activities of the GC32 catamaran internationally. This project, inspired by the 34th America's Cup and the advent of the AC72 catamarans racing with their giant hulls flying above, promises to be fierce and action-packed with legends, Olympic heroes and world champions preparing to do battle at close quarters.

The GC32 Racing Tour is a five event circuit based in southern Europe for some of the world's fastest racing yachts. Sailed by a crew of five, the GC32 is a one de-

sign foiling catamaran that bridges the gap between the state of the art AC50s used in the America's Cup and smaller flying dinghy catamarans. Despite being smaller and simplified than the AC50s, with, for example, a soft sail rig rather than a wing, GC32s are still capable of speeds approaching 40 knots.

For its third season, the GC32 Racing Tour in 2017 will build on its position as the circuit offering the best possible foiling experience to competitors. It will visit venues in Italy, France and Spain that offer the most chance of optimum conditions for high speed foiling: 10-20 knot winds and flat water. Races on the GC32 Racing Tour are typically short, but the venues chosen allow large enough courses to be set, to enable the flying catamarans to stretch their

legs fully and reach the fastest speeds.

Being a simplified, smaller version of the AC50, the GC32 opens up cutting edge airborne sailing to a broader range of crews, from America's Cup and Olympic heroes to private owners such as former Melges 32 World Champion, Jason Carroll. In 2016 the GC32 Racing Tour attracted 11 teams from afar afield as the USA and Japan.

Marinepool is proud to announce its partnership with this spectacular series as the 'Official Clothing Supplier to the GC32 Racing Tour.' The agreement with the series was signed for 2017 and also grants Marinepool exclusive merchandising rights for clothing. The appointment is an important step for Marinepool to further promote its brand on a global scale.

ALINGHI

Alinghi is a Swiss sailing syndicate that was established as a professional unit in 2000 by Ernesto Bertarelli to win the America's Cup, which it did – twice (2003 in Auckland, 2007 in Valencia).

They're the first European team to win the Auld Mug and have plenty of other successes to their name before and since, including multiple Bol d'Or, D35 championships and two Extreme Sailing Series™.

Alinghi came to the public consciousness in 2003 when they not only became the first European syndicate to win the America's Cup, but also the first team ever to win on debut.

The Auld Mug was retained in the 32nd edition, the most successful ever organized in 2007 in Valencia to cement Alinghi's place in history, before the oldest trophy in international sport headed back into American hands in 2010.

A new chapter began in 2011 with Alinghi's return to the Extreme Sailing Series™.

A one-design class, it places sport and competition at the forefront, with each team able to approach the start line with the same chances of success.

Similarly, the Decision 35 circuit provides a great platform for the team to showcase their skills. Victory in the Bol d'Or on Lake Geneva in 2011 (the latter in a new record time for the D35 class of 6 hours 25 minutes) meant that Alinghi joined an elite group of those who have won this prestigious trophy six times. 2013 and 2014 heralded back-to-back D35-Vulcain Trophy victories, taking their all-time total to five and cementing Alinghi's position as the most successful team in the competition's history.

The period also saw the team top the standings twice in the Extreme Sailing Series™ – in 2013, Alinghi lost out on the title on Act win on count back, but there was no such heartbreak in 2014, with Alinghi's second victory in the series, following their triumph in 2008.

In 2015 Alinghi entered the Bullit GC32 Tour and was already winning the third event of the season in Kiel.

In 2016, Alinghi again won the Extreme Sailing Series™. Having started with a win in Qingdao, China, they finished the season with four Act wins in a row, sealing the championship in the season finale in Sydney after an epic final day shoot-out.

It was the third time that Alinghi have won the Extreme Sailing Series™, but the first time they've done so 'flying' on the new lightning-fast GC32 catamarans.

As of 2015 Marinpool has been the Official Clothing Supplier of Alinghi, though the team has been sailing with Marinpool products since 2013. The official Alinghi Merchandising Collection can be found in the Alinghi Online Store

TechInfo: FIELDSENSETM
Moisture Management Fabric

- Effective moisture management combined with high insulation for warm, perspiration-free comfort
- A unique multi-layered 3-dimensional fabric which efficiently transports perspiration outward through capillary action, keeping the wearer dry and comfortable
- Quickly absorbs perspiration
- Carries perspiration rapidly to the fabric's outer surface
- Disperses perspiration throughout the fabric for rapid evaporation
- Tight knitting construction protects you from wind chill, and high breathability allows air circulation within the fabric

| COLOUR | black ocean | |

These are the fabrics for first and second layer garments. The new generation of functional knitwear optimized after years of experience. Fabrics that combine extraordinary heat insulation and breathability with comfort and lightness.

The structure of the fabric wicks moisture outward, eliminating the perspiration formed during intense physical activity (AEROCONTROL), guaranteeing a constant body temperature.

The material is soft and smooth on the skin, non-allergic, does not produce irritating rustling noises and is easy to care for.

| FEATURES | Warm and high stretchable midlayer jacket with a soft brushed fleece inner side. This jacket is absolutely breathable and lightweight, feels like a second skin by perfect shaped seams and fit. | |
| COLOUR | black | |

MERINOWOOL

Natural fibre - Merino wool is a natural, biodegradable and renewable fibre, making it the perfect choice for those seeking clothing that has a minimal impact on the environment.

Merino fiber can absorb up to 35 per cent of its dry weight in moisture vapor. Therefore, in hot climates or during strenuous exercise, a Merino garment close to the skin actively transfers moisture vapor molecules away from the body.

This causes the micro-climate above the skin to become less saturated with vapor, while reducing the formation of sweat droplets on the surface of the skin.

Merino garments protect the wearer from extremes of temperature (hot or cold) because they offer superior insulation and breathability in comparison with other fabrics of similar structure and weight.

GANESHA

Ganesha is a 46m Vitters built superyacht designed for cruising and racing. Named after an Indian deity she is a powerful yacht on the race course, while offering lavish comfort to owner and guests.

The low beam-to-length ratio, low freeboard, sleek grey hull and black tinted windows along the saloon give her a modern, elegant silhouette and balanced aesthetics.

The dual purpose yacht is highly seaworthy, built from aluminium and features a lifting keel, carbon spars and the latest sail technology. Ganesha is capable of speeds nearly matching true windspeed making her a formidable contender with top finishes in all the races she entered in 2015.

Designed for highest level performance and efficiency she has the soul of a racing yacht yet doesn't compromise comfort in any way and, the perfect luxury sailing yacht equally comfortable with family cruising as she is with taking on an adrenaline packed regatta.

EFFICIENCY UNDERWEAR

ACTIVE BASE LAYER

Marinepool Base Layers are helping you to maintain your performance regardless of weather conditions or activity level.

They can be worn for active sailing in warm conditions or as base layers under other layers.

Marinepool Base Layers are high wicking with low water absorption due to the polyester/polypropylene fibres. Moreover they are ultra light weight, while offering exceptional thermal comfort and effectively protect the skin from damaging sun rays. The combination of these innovative fibres with elastane produces a close-fitting comfortable garment with exceptional stretchy characteristics, ideal for all kinds of sports.

The virtually seam free construction allows for body mapping technology with strategic vent zones, areas of warmth and 3D protective knit. Mesh areas under the arms and the warmest body areas guarantee optimal breathing. Areas which need cushioning such as shoulders and knees have a more dense structure to increase protection. Ergonomic construction at the armpit and shoulder leads to even greater mobility. A tight fit on the sides prevents from bothersome folds.

The new generation of base layers actively supports the maintenance of an optimal body climate like never before, crucial for athletes to perform at their best and for your sense of well-being.

AUSTRIAN SAILING FEDERATION

The cooperation of the Austrian Sailing Federation and Marinepool as its 'Official Clothing Supplier' was the first such partnership for Marinepool and it would probably qualify for the record books as one of the longest lasting in the sport, going back to 1996.

Since Marinepool teamed up with the Austrian Sailing Federation, Austrian sailors have won medals at European and World Championships as well as no less than three gold and one silver medal at the Games in Sydney/Athens and scored countless other top results.

And the team continues to excel as one of the best sailing teams in the world with 49ers Delle Karth/Resch, Nacra17 team Zajac/Frank and 470 ladies Vadlau/Ogar being Austria's hopefulls for Rio.

What a difference just two years make was shown by Lara Vadlau. In Weymouth she was watching her British and Kiwi rivals take gold and silver medals while she and her crew finished a disappointing last in the 470 competition.

In 2014 she was standing right in the middle of the very same two teams on top of the

AUSTRIAN SAILING FEDERATION

OFFICIAL CLOTHING SUPPLIER

podium, when she won the World Championship with her new crew Jolanta Ogar.

As the saying goes: never change a winning team. The Austrian Sailing Federation and Marinepool go confidently into the 20th year of the cooperation and keep fingers crossed that the Austrian Sailing Team once again will contribute to the history books in 2016.

FFVOILE – FRENCH SAILING FEDERATION

MARINEPOOL, OFFICIAL SUPPLIER OF THE FRENCH SAILING TEAM

For more than 10 years, the French Sailing Federation and Marinepool have been working side by side to develop the sport of sailing in France. Marinepool supplies the French Sailing Federation with technical and fashion clothing.

Marinepool is very proud of this partnership and results obtained by the French athletes

in Rio this year. The entire team has done an outstanding work and it has paid off with two medals in RS:X gold for Charline Picon and bronze for Pierre Le Coq, one bronze medal in 470 by duo Camille Lecointre & Hélène Defrance and another beautiful gold medal for Damien Seguin in the Paralympic Games, his second gold medal twelve years after the first one!

After these results, the French Sailing Federation is determined to learn from the experience to bring home even more medals from the next Games.

Marinepool will keep providing the athletes with the best products possible to help them train and compete in ideal conditions

THALASSA MAGENTA RACING

The first all-female GC32 team, Thalassa Magenta Racing in partnership with the Magenta Project, make their debut in the Extreme Sailing Series™ in Lisbon.

The new team will race with six crew members, as opposed to five on the all-male boats, and the Canadian-flagged catamaran will be skippered by New Zealand's Sharon Ferris-Choat.

Thalassa Magenta Racing in partnership with the Magenta Project aims to give female sailors opportunities and pathways to compete at the highest performance levels of the sport. The team's entry into the Lisbon Act is part of a long-term ambition to create an all-female crew capable of being competitive in the Extreme Sailing Series™.

Marinepool is proud to be the official clothing supplier for the first all-female GC32 team and we are looking forward to season 2017!

SAILING CHAMPIONS LEAGUE

After two successful years of the SAILING Champions League and three years of sailing in the league format in Europe the SCL organisers from Konzeptwerft are publishing the "National Sailing League Rule Book", the first manual for National Sailing Leagues and the SAILING Champions League.

The first version has been approved by the Steering Committee and will continuously be improved. In the SAILING Champions

League the most successful sailing clubs compete against each other for a whole season in several events.

The teams with its best sailors of the clubs compete against each other to win the title and the trophy.

The competition between the best and prestigious sailing clubs in the world guarantees a high-class sailing event!

In 2016 the reigning German League Champions of Deutscher Touring Yacht-

Club won the regatta at Yacht Club Costa Smeralda in Sardinia and were awarded with the Robbe & Berking Trophy for the "Best Sailing Club".

As a cooperation partner, we are looking forward to season 2017 with the SAILING Champions League!

| SPECIALS | WP 10.000mm / MVP 6.000g/sqm/24h | |
| COLOUR | navy | |

RUS YOUTH SAILING TEAM

The Russian Yachting Federation in recent years has focused its priorities on the development of the Russian Youth Team.

The primary goal is to provide all the support Russian sportsmen and women need to win medals at the 2016 and 2020 Olympics.

The results so far have been more than impressive:

- Medals at major European and World Championships
- 1 junior license for the 2016 Olympics
- 2 newly opened youth training centres in Moscow and Sochi

A great part of the success can be put down to participation in the International Youth Cup. Teams from Russia, Italy and France took part and the young athletes, coaches and team leaders had the chance to share and experience new ideas, and show off and improve their talent and skills.

The initiative for organising the Youth Cup came from the Russian Yachting Federation and the Italian Sailing Federation.

"yacht" magazine, Germany, issue 12-12

Marinepool 300N Premium

Test winner 5 out of 5 stars

"Fully equipped, convincing and great performance"
"Turns quickly and reliable, very bright LED sea light"
First out of 14 jackets tested.

Waterkampionen, Holland, March/April 2013

Marinepool 300N Premium

Test winner

"This Lifejacket delivers both good performance and is also very complete"
First out of 12 vests tested.

Trailer Boat magazine, Australia, May 2011

Marinepool 180N Premium

10 out of 10

"This is a quality product designed to last and with good safety features"
First out of 8 vests tested.

Vene magazine, Finland, February 2013

Marinepool 180N Premium

"Highly recommended"

"Secure turning and especially good freeboard and body angle"

"yacht" magazine, Germany

Marinepool 180N Racer Plus

4 out 5 stars, Marinepool 180N vest in a 275N review

Beating most of the 275's on test although it's just a 180N vest!!!
"Very short activation time, well designed operating head pocket, compact buoyancy, good swimming position"

Vene, Finland, February 2013

Marinepool 180N Pro

Test winner, 5 out 5 stars

"Surprisingly the clear test winner by some way"
"Turned all subjects in ALL conditions and the floating position was constantly and excellent one"
"One of the most comfortable jackets we ever wore"

Icjkuriren, Sweden

Marinepool 180N Pro

June 2013

"High buoyancy, turns fastest in the water"

developed and produced in the EU

The new range of lifejackets provide fantastic protection.
Approved to the ISO standards which all newly designed lifejackets must meet.

And the winner is . . .

ISO 300N PREMIUM Inflatable Lifejacket

ISO 12402-2

Art.-Nr. 5000602 with sprayhood an light

300N

FEATURES

- 300N buoyancy through 60g CO₂
- hook-and-loop closure cover or coil zipper with quick burst point
- ergonomic shape
- ISO 12401 deck safety harness or SS40 quick release waistbelt
- very fast turning times due to well-placed buoyancy
- comfortable to wear due to optimized distributed weight across the shoulders, mesh and double back straps
- padded removable fleece collar
- Solas approved light (optional)
- 12402-8 easy don spray hood (optional)
- choice of UML Pro sensor or Hammar MA1 operating systems with status window, Halkey Alpha operating head
- leg strap as standard on all models
- coarse polyester webbing so buckles do not slip

COLOUR

black | navy | red

ISO 12402

Products newly designed, developed and introduced to market will be approved to ISO12402.

These standards are intended to ensure that all lifejackets sold meet very stringent requirements regarding the design, performance, materials and components used and even give guidelines regarding the information to be provided to the customer about the lifejacket.

- More stringent test criteria meaning lifejackets have to be far superior in every way

- All components must be individually approved then assembled together and approved as a lifejacket
 - Annual surveillance testing for safety harness and a 5 year certification for the product meaning every 5 years it needs renewing
 - Accepted worldwide (except USA)
- All of the above have 1 outcome. A superior performing product in every possible way. Marinepool lifejackets providing unrivalled comfort, security and support for users. Designed to outperform the ISO 12402 requirements, providing increased performance in the most demanding of environments.

techinfo:

UML Pro Sensor Inflators

Affords the user a 'clearly visible' point of status indication, to confirm that the unit has been automatically or manually activated

- the unit also provides the added benefit of detecting if the CO₂ cylinder has been pierced, eradicating the possibility of accidentally fitting a pierced gas cylinder
- simple re-charging procedure
- the automatic pro-sensor is fitted with the latest 'all weather' cartridge with the added benefit of inhibiting the accidental ingress of moisture and water spray, during hot humid or heavy stormy weather
- no service requirements for 3 years on the inflators

techinfo:

The Hammar Standard System

Some big-benefit features of the Hammar manual/automatic lifejacket inflator

- unique hydrostatic valve that protects the water sensitive element. No activation in rain, spray, splash and humidity (1)
- single point indicator (green) shows that the inflator is ready for use (2)
- cylinder seal indicator (green) ensures that the cylinder has not been used (2)
- gas cylinder located inside the life-jacket bladder. Cylinder protected against corrosion, reduces snagging hazard (3)
- no service requirement of the inflator cap for 5 years.

The manual/automatic version works like this: when the inflator is lowered more than about 4 inches in the water, then the hydrostatic valve opens and lets the water meet the water sensitive element (4a), that in turn releases a stainless steel coil spring. The spring then drives a needle into the end of the gas cylinder, which is now punctured so that the gas instantly fills the lifejacket (4b). total buoyancy is normally reached within 4 – 5 seconds.

If you want to test your lifejacket in water, you can do this without activating the inflator. Just inflate your jacket through the oral tube and then go swimming. The counter pressure inside the bladder will prevent the hydrostatic valve from opening! That way you will not use up your gas cylinder. After your swim, let the jacket dry off, and then deflate it.

For rearming instructions please check www.marinepool.com

EFG SAILING ARABIA - THE TOUR

Launched by Oman Sail in 2011, EFG Sailing Arabia – The Tour was designed to reignite the Gulf region's maritime heritage by celebrating the fast-growing sport of sailing and the opportunities that it represents. The regatta is also an opportunity to showcase the beautiful region as the ideal winter sailing destination and present its offerings as an international stage for high-calibre sailing events.

EFG Sailing Arabia – The Tour is contested in a fleet of identical Farr 30 yachts – one of the most exciting boats on the professional sailing circuit – along a course, which stretches each crew to the full, testing their skill, teamwork and versatility.

In its short history, EFG Sailing Arabia – The Tour has gained global recognition, attracting top amateur and professional sailors from four continents and blue-chip

sponsors. Now in its sixth year, The Tour has become one of the most respected and dynamic sailing regattas on the international circuit.

Marinepool is an official event sponsor and supplies the majority of the teams with performance sailing clothing and safety equipment.

The size charts are based on experience and only a guide line for your choice. The actual fit depends on an individuals' body and Marinepool does not guarantee the fit, even though your body dimensions might be within the range in the chart.

1. Chest width:

measured straight over chest and back

2. Waist line:

measured at the narrowest part of the upper part of the body

3. Hip line:

measured at the widest part of the body

4. Body size:

height overall

| | | | |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3+1 layer | Tough outshell fabric with HB or XPU Membrane. 3L = Outshell + Membrane + Tricot backing bonded together permanently. An additional coating (+1) provides extra salt water protection for the membrane. | | Durable Water Repellency avoids the outshell fabric surface to be soaked with water, maintaining breathability. |
| 3 layer | Light, but tough outshell fabric with NX Membrane or other. 3L = Outshell + Membrane + Tricot backing bonded together permanently. | | Super Durable Water Repellency avoids the outshell fabric surface to be soaked with water, maintaining breathability. |
| 2,5 layer | Light, but tough outshell fabric with DT Coating. 2,5L = Outshell + Coating + Print (to protect coating = 0,5L). | | Fabric is waterproof as it is outfitted with some kind of waterproof membrane or coating. Watercolumn in mm. |
| 2 layer | Durable outshell fabric with Coating or membrane. 2L: Outshell + Coating / Membrane. | | Fabric is breathable as it is outfitted with some kind of breathable membrane or coating. Breathability given as MVTR value (g/m²/24h) or RET value. |
| | HB Membrane used for 3+1L fabrics offers extreme waterproofness and high breathability plus increased salt water resistance. | | Fabric is windproof and protects therefore against wind-chill (which causes massive heat loss). |
| XPU | XPU Membrane used for 3+1L fabrics offers extreme waterproofness and high breathability plus increased salt water resistance. | | Extra tough shell fabric for all over heavy duty requirements. |
| NX | NX Membrane used for 3L fabrics offers extreme waterproofness and top level breathability. | | Used for areas with high exposure to friction/abrasion. |
| DT | DT Coating used for 2,5L fabrics offers reliable waterproofness and high breathability. | MVTR | Breathability (Moisture vapor transmission rate). The higher the value the better is the breathability. There is no conversion between RET and MVTR and one will not determine the other. |
| MPU COATING | MPU Coating for 2L fabrics offers reliable waterproofness and good breathability. | RET | Breathability (Resistance to evaporative transmission). The lower the value the better is the breathability. There is no conversion between RET and MVTR and one will not determine the other. |
| MPU MEMBRANE | MPU Membrane used for 2L fabrics offers reliable waterproofness and high breathability. | HPU | Performance hydrophilic PU Membrane is a nonporous membrane which provides very high breathability and waterproofness. Its durable function is based on a physical and chemical principle. |

| | Used for areas with high exposure to friction/abrasion. | | |

L'azzurro del Mare

SPIRIT OF THE OCEAN

Water, wind and sun - sailing is playing with the elements!

The summer collection 2017 "L'azzurro del Mare" was created with these essentials in mind.

It is a tribute to the countless shades of blue the Mediterranean Sea has to offer. We discover the fine line where the sea blends into the blue sky and where sun light is reflected in the water, painting a world full of colour, from azure to emerald to curacao.

The collection is characterised by three colour themes to guide you and by versatile options to combine garments and create your own distinctive look. A variety of modern oversized shapes is matched with skinny long shirts, long blouses and a semi transparent voile fabric – perfect to create a maritime layered individual outfit.

The new styles we designed fit perfectly with smart basics in the Marinepool crew wear collection and can be combined with bottoms in a great variety of classic or flashy colours.

Take a step into the deep blue of the ocean, feel the spirit and breathe the summer feeling. When sailing in azure waters, when light plays with the colours of the sea, when waves are the only sound you can hear, then life melts into pure joy.

VIVA IL MARE BLU!

MARE T-Shirt Women

Régates Royales
MARINEPOOL
Edition Limitee

RÉGATES ROYALES

The Régates Royales collection of Marinepool stands for the flair of Cannes and is literally demonstrating the maritime lifestyle therefore the collection 2017 is chic, elegant, casual and classic in every way.

Since 1929 the Yacht Club of Cannes organizes every year the Régates Royales

which is one of the most important international events as a part of the Panerai Classic Yacht Challenge on the French Riviera. Crew members coming from many different countries are racing on more than 140 yachts.

Already since 2008, there is a corporation between Marinepool and the

Régates Royales in Cannes, one of the biggest classic yacht races in the world. Marinepool is pleased with the extended partnership and the title as official clothing partner of the Régates Royales de Cannes creating again another special collection this year.

TECHINFO A-CLIMA:

A-Clima is a special sole system that was designed for the challenges of marine use and consists of three units which are combined to provide outstanding comfort and performance under all boating conditions. The outer non-marking rubber sole by Vibram® with its integrated sticky brake structure offers excellent grip on wet and dry surfaces. The midsole uses the latest EVA technology and provides quick and reliable drainage, ventilation and is shock absorbant, while being super light weight. The anatomical, fabric lined footbed is removable.
